

# 1901 CENSUS ANGMERING

PRO RG 13/961

## Transcriber's Notes

Transcribed in 2006 by RW Standing from printouts supplied by NA Rogers-Davis.

Statistical information and notes at the beginning of the census, with populations and other calculations, have not been supplied.

The enumerator who filled in these forms wrote very clearly in general.

The original layout in numerous columns has not been followed exactly due to lack of space. The first sets of information about houses are placed at the head of each group of names of people in that household. Parishes of birth are not transcribed for those born outside Sussex.

Ordinary Agricultural labourer is here shortened to ag lab

Various job descriptions appear to have been regularised later, such as stock man on farm to ag cattle, the longer particular description is given where readable

In the address columns there is a slightly ambiguous use of ditto do do, it is not always certain whether the road name is being repeated or the road and house name.

The names Mills, Miles, etc are not always easily distinguished from each other.

Notes are placed in square brackets [] and these include addresses assumed to be correct where the column merely has do ditto, indicating a previous address or part of an address.

Column 7 is headed by the words: Number of Rooms occupied if less than five. This transcript has the heading Rooms, followed by the number or a blank space where the census leaves the column blank because the house has five rooms or more.

Children being single is not always mentioned, but this transcript fills this in as self evident

Although the census numbers the forms for inhabited dwellings, those not in occupation are not numbered, and in these cases the previous house number has been employed with \*\*

Dotted lines indicate the ends of individual sheets or forms, which have varying numbers of houses scheduled on them, to fit the page.
